## **Samsung Galaxy Note 7**

Samsung Galaxy Note 7 smartphones contain lithium ion batteries which are known to spontaneously combust. At present, Samsung is warning users of these devices not to power them up.

■ Samsung website:

<http://www.samsung.com/us/note7exchange/>

Therefore, for safety reasons, we are asking users of the Samsung Galaxy Note 7 for their cooperation as set out below while within airport facilities.

- Ensure that your device is switched off
- Refrain from recharging the battery in your device

In regard to its use on board the aircraft, the Ministry of Land, Infrastructure, Transport and Tourism (MLIT) has issued a directive banning the carriage of this device on all aircraft.

■ MLIT: Additional Measures Concerning Samsung Galaxy Note 7
